

**We set goals for ourselves –
but no limits.**

Our mission – to achieve
the unexpected

Brakethrough Technology

We keep the impossible in our sight – and we make it happen.
We are never content – we keep on and on. We set milestones
on the path to new goals.

Always looking ahead

We have been the brake specialists for over 100 years now – and we are also acceleration experts. Why? Because we have repeatedly pushed the envelope of brake technology – with unrestrained curiosity and pure passion, with experience and far-reaching vision. And that is our plan for the future.

Why are innovations part of our company's ideology? Because we love taking everything to the limits. To find out how we can best surpass them. Everything for our customers.

**We give
our all**

As part of the Continental Corporation, we have expertise in the entire automotive sector. And that means in a global network, in which more than 200,000 people are already working today on the solutions of tomorrow.

**More than
just brakes**

Brakethrough Technology

Thanks to our ground-breaking technologies for braking systems, we give vehicle manufacturers, workshops and car drivers an absolute maximum of safety. We also accompany them on their route to the future – as a partner on whom they can always rely. Because this much is certain – we're always on the move.
